Horizon / H4

H4 650J Fireplace with 660LSB Outer Landscape Surround in Black, 661BSP Inner Bezel Surround in Brushed Nickel, 620FBL Fluted Black Liner, 534RSK Creekside Rock Set Kit & 761DRK Decorative Rock Kit
For well over a decade, the Horizon Series has expanded its line of diverse, energy efficient, heater-rated fireplaces. A vast collection of quality fronts, beautifully finished surrounds and radiant fire beds have fueled impressive product innovations and excelled performance in the field.

Environmentally conscious consumers now expect more from their fireplace. Not just a dancing ‘realistic’ flame but a fire that makes the hearth a home, welcoming family and friends. A fireplace that performs and does so with energy efficiency and comfort control in mind. A dependable heater that you can rely on, even during a winter storm or power failure.

Valor took this to heart and the Horizon Series is the result both visually and in function. Additionally, the Horizon is flexible in application as an insert or new construction fireplace.

Compact in design, the Horizon engine features a range of installation opportunities in both top and rear vent applications. Made of thick gage aluminized steel and housing a performance enhancing heat exchanger, the Horizon fire box is built to last.

Designs range from traditional to contemporary and everything in between. Clean fronts, traditional casting and handcrafted ceramic fire beds all promote the core principle of Valor - that quality matters.

Over 100 years of heating experience accompanies the latest advancements in gas fireplace technology. So what does this mean to you? Simply put, Valor provides reliable warmth where you want it, when you want it and will continue to do so for many years to come.

Designed as a four-sided version of the Horizon fireplace, the H4 Series eliminates the need for a traditional hearth in your living space. Elevated to your preferred height the H4 nestles comfortably in your choice of surrounding wall surfaces.

Benefiting from the successes of the Horizon engine, the H4 has the same aluminized steel firebox, secondary heat exchanger, fire bed options and brick liner combinations.

Integrating contemporary design with impressive heat performance, the ValorStat Plus handheld remote controls room temperature with ease. Programmable settings include a timer and temperature feature that provide consistent warmth for as long as you desire.

Efficient warmth meets modern living to showcase a collection of clean, timeless designs. Choose from two different (landscape and square) backing plates and one of four inner bezel surrounds in copper, nickel painted, nickel plated or black.

A welcome addition to the Horizon Series the H4 is a culmination of engineered heat performance, advanced comfort control and the latest in contemporary hearth design.

FIREPLACE SAFETY - USE RADIANT HEAT SAFELY

Fireplace surfaces, in particular the glass viewing window, are extremely hot during operation and will remain hot for a period of time after the fireplace is turned off. Contact with the hot glass can cause severe burns. Close adult supervision is required if there are young children, or at-risk individuals in the house.

 Included with your purchase, a Valor barrier screen is recommended at all times. Install an approved aftermarket safety gate to keep toddlers, young children and at-risk individuals a safe distance from the fireplace.

For more information please visit www.valorfireplaces.com/safety.

THE COMFORT ZONE

Pumping forced air heat through your entire home is often inefficient. Targeting specific areas that you frequent the most is more economical and efficient in the long run. Zone heating with a Valor requires no ducting or forced air, delivering the perfect blend of radiant and convective warmth – where you want it, when you want.

RADIANT WARMTH

Like heat from the sun, Valor fireplaces distribute radiant warmth directly to your living space. Radiant heat satisfies human comfort needs, using up to 25% less energy compared to traditional forced air systems. Valor warmth effectively replaces the chill from cold windows and doors, providing steady, even heat to objects in the room. Designed to circulate warm air through natural convection, the Horizon Series raises gas fireplace standards in product performance and efficiency.

HEAT DURING A POWER FAILURE - NO POWER, NO PROBLEM

If the power fails in the winter your home can get cold fast. Valor fireplaces are fully functional heaters that don’t use electricity. Our fireplaces provide the perfect mixture of radiant and convective heat reducing the need for a fan. No power, no problem with Valor.

BURN CLEAN, ENGINEERED GREEN

Natural gas is the cleanest fireplace fuel you can burn, with the lowest particulate levels and lowest levels of greenhouse gases. Valor specializes in the design of cost effective, heat solutions for your home.

VALORSTAT PLUS REMOTE - HOME COMFORT CONTROL

Standard with purchase, the Valor Comfort Control manages your heating needs with convenience, reliability and simplicity. Valor’s touch button handset ignites the pilot with ease, adjusts flame levels as desired and has programmable options including room temperature control. Eco-friendly in design, your pilot flame will automatically turn off if the fireplace is inactive for over 5 days, saving energy and lowering overall home heating costs.

THE WISE WAY TO HEAT
