VENTED CHASE OPTION

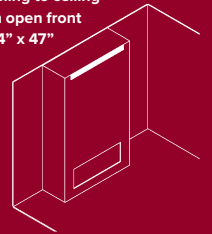

When installing a TV above the fireplace, Cool Touch Walls, or reduced Mantel Clearances, the chase of the fireplace must be vented. This can be done by either installing a grill on the front of chase or side grills (for a chase that bumps out in to a room) or be open at the top of the chase. (See illustrations and manual for further information).

Minimum enclosure height for a vented chase is 70" from bottom of fireplace, ventilation of a 105 in² of minimum free air opening is required.

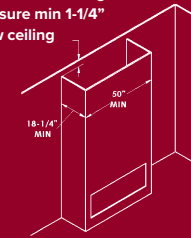

Choose between our V46EG Enclosure Grill or Custom Grill (if custom grills are used the louvers cannot slope) or adequate ventilation opening as stated in the manual. Grill or opening must be within 2" of chase top/ceiling.

NOTE: To vent the fireplace chase, removal of vent shields from the fireplace is required.

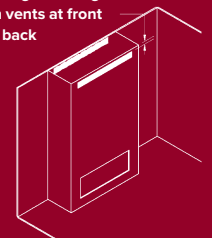

Framing to ceiling with open front 2-1/4" x 47"

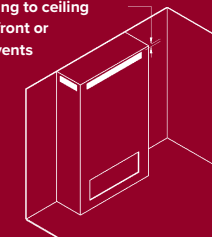

Open chase framing with enclosure min 1-1/4" below ceiling

Framing to ceiling with vents at front and back

Framing to ceiling with front or side vents

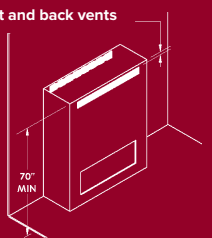

Framing to ceiling, minimum enclosure with front or side vents

Minimum enclosure with front or side vents

Minimum enclosure with front and back vents
