heating and cooling
can account for
more than **50%**
of a home's total
energy use*

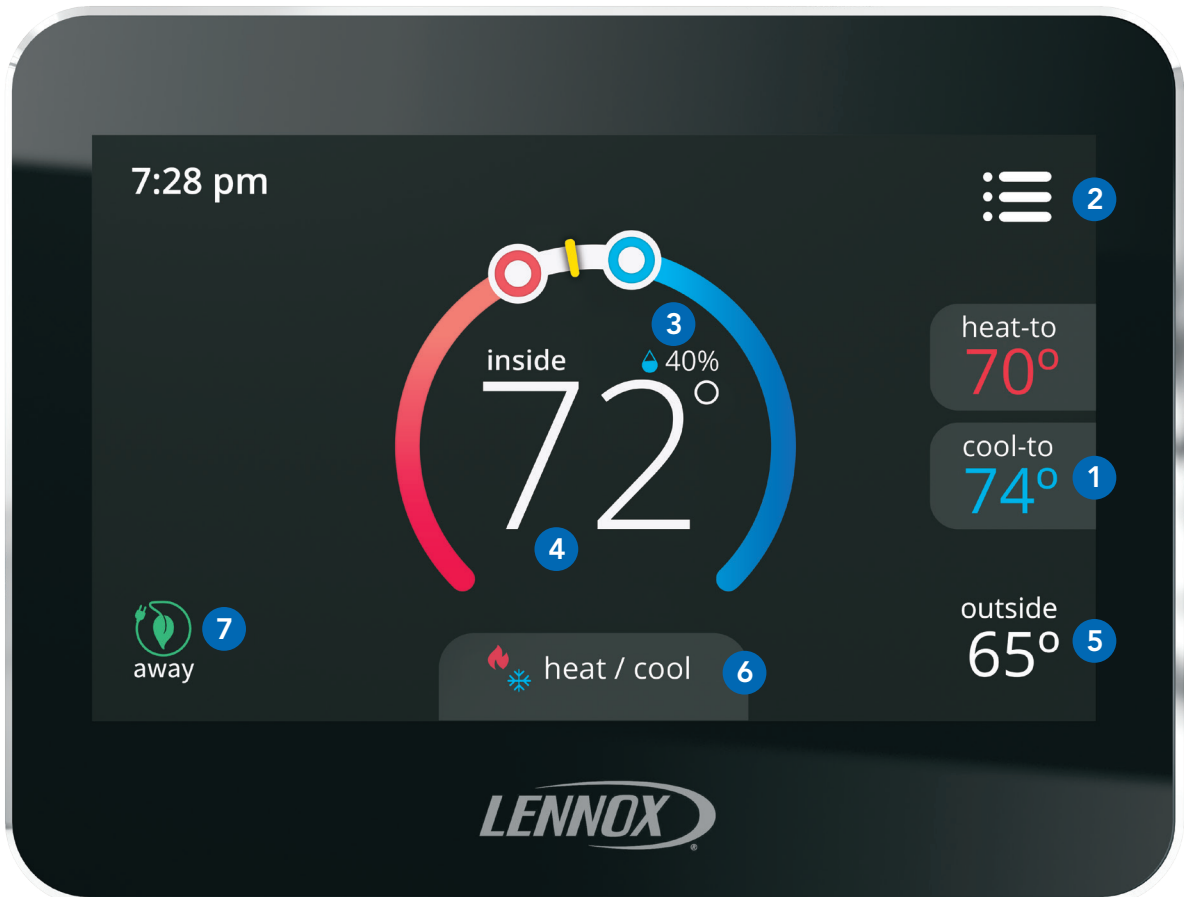

Managing energy costs calls for ComfortSense®.

The Lennox® ComfortSense line of programmable thermostats can help you manage your heating and cooling schedule, and your energy costs, without sacrificing comfort.

[ComfortSense helps save energy without adding complications to your day.](#)

Programmable thermostats can have a significant effect on your energy costs. The problem is, some models can be difficult to set up and use. Lennox can help solve that problem with the ComfortSense thermostat line.

Energy-smart comfort has many advantages.

Every sleek, attractive ComfortSense® 7500 and 5500 Series thermostat makes programming an energy-saving schedule remarkably easy. But the advantages don't stop there.

1. **Heat-To/Cool-To Set Point:** Simply tap the circles to adjust your desired temperature range.
2. **Menu:** Access energy reports, alerts and other system settings.
3. **Humidity Level:** Displays your home's current humidity level (CS7500 only).
4. **Target Temperature:** Shows the temperature you've selected with your Heat-To/Cool-To points.
5. **Outdoor Temperature:** Shows the temperature outside your home (CS7500 only).
6. **Modes/Schedules:** Used to adjust your system's operating mode or programmed schedule.
7. **One-Touch Away Mode:** Turns down heating or cooling to save energy when no one is home.

up to **\$180** per year
in energy savings

That's how much a properly
programmed thermostat
can save you*

save as much as
1% per degree
on energy costs

when you program your system to scale
back use while you're gone**

ComfortSense thermostats are designed to save energy and money.

Energy Reports make saving even easier.

The CS7500 and CS5500 Series thermostats generate Energy Reports that let you compare your monthly heating and cooling usage. Then, you can adjust your settings as needed to help reduce your energy consumption and utility bills.

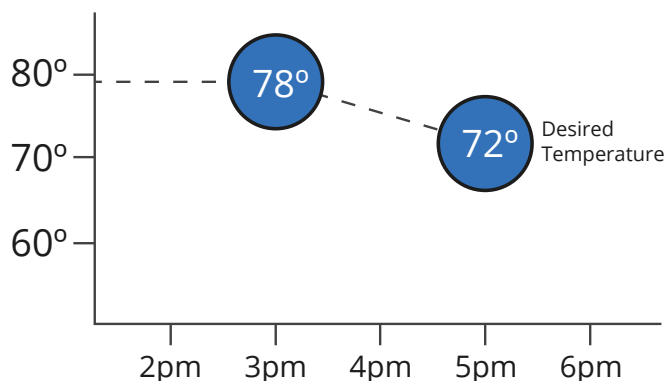

Smooth Setback Recovery helps manage your home comfort.

Like most homeowners, you probably set your thermostat back when you are not at home. Traditional thermostats only start to ramp up to your desired temperature at the specific time you programmed. However, if there has been an extreme temperature change, that ramp up period might not be enough to create a comfortable home environment when you step through the door.

The Smooth Setback Recovery feature on the CS7500 and CS5500 senses extreme temperature changes and begins the temperature recovery process up to 2 hours before the programmed time. This slow temperature ramp up not only helps to ensure a comfortable environment when you arrive home, but also saves energy too.

.....
Smooth Setback Recovery was designed to make sure the temperature is where you want it, when you want it.
.....

Lennox makes a thermostat to fit every need.

Lennox® continues to push the boundaries of advanced heating and cooling, creating technologies designed to maintain an indoor environment like nothing you've ever felt. Our advanced controls are at the heart of that pursuit.

Compare the features of the ComfortSense® 7500, 5500 and 3000 to find the heating and cooling control solution that's best for your home, your life and your comfort.
