

R-Series Indoor-Outdoor

Redefine Your Home Experience

Enjoy the expanded sense of space and the comfort of a unique modern fireplace. Twice the amount of fire and relaxation, both indoors and outdoors.

Indoor-Outdoor Design

Break away from traditional and elevate your home's design with a unique fireplace experience. Add incredible ambience and a feeling of expansiveness - a complete fusion of indoor and outdoor living.

Burner Technology

A flame viewing experience unlike any other. The long elegant flame creates a relaxing atmosphere. Your desired glass media can completely cover the bed of the firebox, enhancing the ambience whether or not the fireplace is in use.

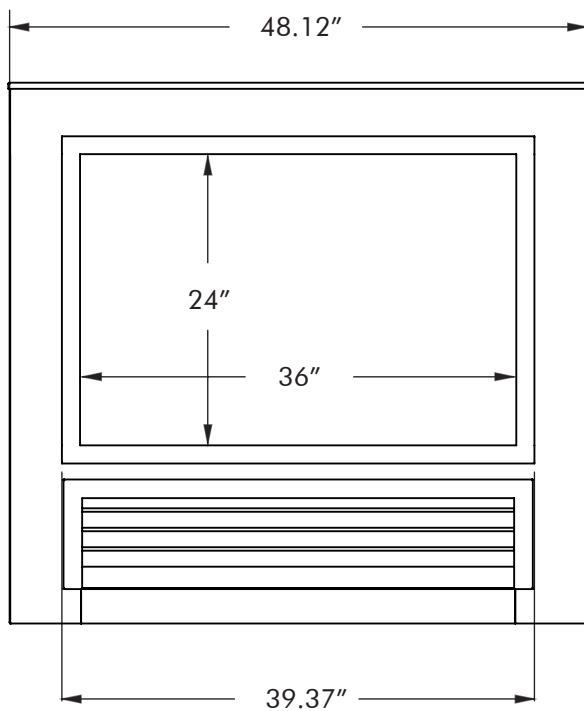

Downdraft Power Vent

Complete architectural design freedom. The absence of a vent run facilitates uninterrupted views with windows around the fireplace. The small footprint means you can install the fireplace anywhere around the exterior of your home.
